Unspent Capital

The Philosophy of Saving, Spending, and Shaping the Future with Bitcoin

Presented by James Viggiano

Unspent vs Spent

Shape the world around you

Every time you spend there is an opportunity cost

What Makes Bitcoin Unique?

- Fixed supply (can’t be diluted)
- Requires Proof of Work (energy)
- Decentralized, Uncorruptible
- Free speech money

There’s only one Bitcoin

Not 21 million, just one.

Earth = Hectares, Square Metres
Bitcoin = BTC, Sats

Your node guarantees this.

Running a node ensures the consensus rules that define bitcoin are not broken.

The fixed size protects you from dilution.

Money in the bank ≠ savings

You’re a creditor, not a saver

Lending them money for them to use

Subject to inflation

If interest doesn’t keep up with inflation, it won’t grow your wealth, it erodes it.

Cash ≠ evil, it's just a cache.

Fiat is a temporary storage for your money.
